# CLASH NAVIGATOR

NAVISWORKS CLASH NAVIGATOR FOR REVIT

MODELLING | D16

Summary

Manage **Navisworks®** clashes directly in **Revit®**, without the need for **Navisworks**. The tool requires a Navisworks Clash report (generated through **Navisworks**), after which it enables model coordinators to manage, find, and solve model clashes directly in the **Revit** environment, using the Clash Navigator.

What makes this module special?

- Solve model clashes in **Revit**

Detailed Description

This tool works with the **Revit** element IDs that were used in **Navisworks** to perform the clash report. It is therefore important that the same elements still exist in the **Revit** project.

Export a text formatted clash report from **Navisworks** Manage.
