TeamViewer

Corporate License

Designed for Managed Service Providers (MSP) and Teams with Multiple Users Where Multitasking Is a Must

- ✓ 30 Licensed Users
- ✓ 3 Concurrent Connections (Channels)
- ✓ Unlimited Endpoints

Corporate License Highlights

- ✓ **30 licensed users**, so 30 users on your team get a licensed TeamViewer account and can start connections from an unlimited number of devices..

- ✓ **3 concurrent connections (channels)** so at any given time, 3 of your licensed users can each use their own channel to open concurrent connection channels from their computers or mobile devices. Each person can then connect to up to 15 devices, in separate tabs, for productive multitasking.

- ✓ **Unlimited endpoints**, so you can remotely access, support, and control as many attended devices as needed (i.e., desktop computers, laptops, phones*, or tablets*). For attended access to laptops or desktops, support recipients simply run a QuickSupport module, then accept incoming connection requests to allow one-time remote support sessions. For attended access to mobile devices*, support recipients run the TeamViewer Quick Support app, then accept incoming connection requests to allow remote support.

- ✓ **500 managed devices**, so you can remotely access, support, and control unattended devices, such as servers, point of sale (POS) systems, digital signage, or kiosks. Unattended devices must have the TeamViewer Host app installed on them and do not require another person to accept an incoming remote connection request.

- ✓ **Reporting**, so you can monitor and track all incoming device connections, plus automatically log every outgoing user connection for compliance, billing, auditing, and productivity purposes.

- ✓ **Mass deployment**, so you can silently and instantly install TeamViewer on hundreds (or even thousands) of devices, for easy unattended access across your network.

- ✓ **TeamViewer Meeting**, so each licensed user can host a secure videoconference or VoIP call with up to 10 participants. Collaborate using instant chat, screen sharing, and more across devices and platforms — anywhere you meet. *(Hosting meetings with up to 300 participants requires a TeamViewer Meeting subscription upgrade. Learn more at teamviewer.com/meeting.)*

Remote Connections to mobile devices from computers require the Mobile Device Support AddOn.

How it works

When accessing or providing remote support for devices, there's no charge to you or your support recipients to establish incoming remote connections. That means you can use your TeamViewer licensed user accounts to remotely access and support an unlimited number of endpoints (computers, servers, or mobile devices*).

The Corporate plan comes with 3 concurrent connection channels, enabling 3 different licensed users to open their own concurrent connection channels and connect to up to 15 devices — all at the same time.

With 30 licensed users, each team member gets their own licensed TeamViewer user account.
Each concurrent connection channels lets you connect to up to 15 devices at a time.

Desktop and Laptop Computers

Servers

Mobile Devices*

If your team needs more than 3 concurrent connection channels extra AddOn channels are available (a maximum of 10 channels can be used per Corporate License).

*Remote connections to mobile devices from computers require the Mobile Device Support AddOn.

TeamViewer Security

Your Security Is Our Top Priority

All remote sessions are secured by end-to-end encryption.

Expand Your TeamViewer Subscription with These AddOns

Mobile Device Support

Get secure remote access with full remote control and universal support for all Android devices running version 7 or above, plus industry-first iOS screen sharing.

Learn more at teamviewer.com/mds

Additional Concurrent Connections (Channels)

The number of Concurrent Connections (Channels) determines how many licensed users can start remote sessions from different devices at the same time. A maximum of 9 concurrent connection channels can be added for a total of 10.
