

Asset Management by TeamViewer

Your entire IT inventory – just a click away.

What software is installed where?
How much memory is in use?

TeamViewer Asset Management offers you an elegant solution for acquiring an overview of the operational hardware and software in use in your organization at any given time. With just a few clicks, you will receive all of the essential information about your inventory.

Inventory Tracking

From the installed memory (RAM) to an overview of specific software versions, never lose track of your IT inventory with TeamViewer Asset Management.

Hardware

Capture your operational hardware in a comprehensive inventory report in seconds.

- ✓ Type ✓ Name
- ✓ Details ✓ Manufacturer

Software

Check whether or not inappropriate software has been installed in your infrastructure, or if your licenses fully account for actual software use.

- ✓ Version ✓ Change date

Inventory Reporting

With TeamViewer Asset Management, you can generate comprehensive reports about your hardware and software. In seconds, you'll have a complete inventory report, or a report you created focused on specific content.

You can also export the information to a CSV file for use in other applications.

Important Device Information

Know more about your devices right away. TeamViewer Asset Management provides you with an overview of important device information up front.

With just one click, you will be presented with the operating system, installed hardware, respective network domain, and internal and external IP address.

Take Your IT Service Management to the Next Level.
