

Patch Management by TeamViewer

Automatic Third Party Software and OS Vulnerability Patching for Windows and macOS

Only one unpatched device puts your entire IT at risk.

Patch Management by TeamViewer is your integrated solution to detect and patch vulnerable, outdated software. Keep your IT infrastructure up to date and safe by automatically evaluating and applying OS and 3rd party application patches.

Comprehensive & Intuitive

Patching doesn't have to be complicated.

With Patch Management by TeamViewer, you will not spend hours familiarizing yourself and your staff with an un-intuitive solution.

Benefit from a solution that is easy to use, yet comprehensive and agile. Quickly see the update statuses of your devices, and all available patches from one convenient location.

Operating System Updates

Keep your Windows and macOS devices up to date by managing and deploying Windows updates from a central location.

Custom Policies

Define individual policies to accommodate the varying needs of your end-users, entire departments, or different customers.

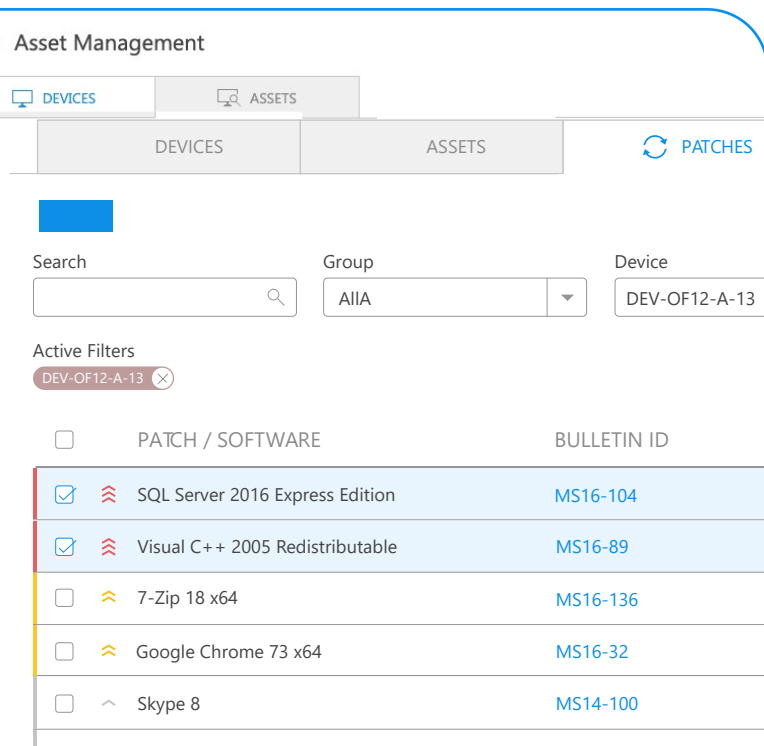

Third Party Applications

Don't put your IT at risk by only focusing on OS updates. Monitor and deploy patches for third party applications automatically.

Automation

Automate your patching process! Automatically detect and patch software and OS vulnerabilities.

Supported Third Party Applications

Scan or click the QR code to see the hundreds of supported third party applications.

Take Your IT Service Management to the Next Level.
